

PRESS RELEASE – March 22nd, 2021

First collaboration for Courchevel Méribel 2023

We are very proud to announce our first collaboration in Courchevel Méribel 2023.

It's a collaboration of choice ! Head brand will equip all the teams working on the slopes during the World Championships with helmets and masks wearing our colors.

And so that everyone can enjoy it, the Courchevel Méribel 2023 helmet and several mask models will be available for sale next winter in stores and on our future e-shop.

The helmets and masks presented include the latest exclusive technologies developed by HEAD offering an optimal protection. The REV helmet incorporates the Sphere Fit system for a comfortable fit while the new CONTEX PRO goggles will feature a screen incorporating 5K technology to increase contrasts and brilliance of the colors. Children can also wear a mask with the STREAM.
